Passive Houses are affordable!

View a Passive House every Wednesday from 15.00 to 18.00

"Passive Houses are buildings which ensure a comfortable indoor climate in summer and in winter without needing a conventional heating system."

A passive house is not allowed to use- more than 10 Watt / m^2 on the coldest day of the year while still maintaining 20° in the entire house.

Typical Section of our Passive foundation

A Passive House of 100m^2 (1000sqft), like this, can be built for
€ 100,000 (foundation, shell & materials) or
€ 150,000 (turn-key)

Section through a Passive House with single storey
